

CHOYAL HUB FOR AGRIBUSINESS RESEARCH, GROWTH AND ENTREPRENEURSHIP

Professional Agribusiness & Milling Education

India's First School Dedicated To Agribusiness!

We are making accessible agribusiness education a reality.

- Wide Range of Technical Education
- Seminars and Workshops on Ground Training
- Hub for All Needs of Setting Up Agribusiness
- Practical Hand Holding on Growth & Entrepreneurship

WELCOME TO CHARGE

We began our journey as CSMT (Choyal School of Milling Technology), a specialized institution focused on equipping students and professionals for successful careers in the food processing and milling industry. As the world evolved and the needs of both students and the agribusiness sector expanded, we recognized the importance of growing with it.

To meet these changing demands and broaden our impact, we transformed into **CHARGE** — the Choyal Hub for Agribusiness, Research, Growth, and Entrepreneurship. Today, CHARGE stands as a dynamic knowledge, research, and innovation hub dedicated to advancing India's agribusiness ecosystem. We are committed to nurturing the next generation of agri-entrepreneurs, industry leaders, and researchers through a diverse range of certified training programs, applied research initiatives, incubation services, and business development opportunities.

Our mission is to bridge the gap between education, enterprise, and innovation, driving sustainable growth and creating meaningful opportunities in the agribusiness sector. CHARGE is a CSR initiative by the R.S. Choyal Group, committed to knowledge sharing and industry development., Choyal Group is an ISO 9001-2000 accredited in the field of Manufacturing from 1966 & Exports from 1970 and is aimed at promoting purposeful skill-oriented technical education in food technology. We believe that what we take from society has to be given back, hence CHARGE run on a no-profit- no-loss basis.

We offer a wide range of courses including hands-on Technical Training, Seminars and Workshops around the world. We implement programs through our training centre and on-job training facility located in Arjunpura District Ajmer, Rajasthan, India.

Speech from the Practitioner

Leadership for tomorrow

It is a privilege for me to address a few words to you. CHARGE is an educational institution whose aim is to provide a vision for excellence in food & related sciences by encouraging innovation and facilitating career development. For over five decades, we have been one of the leading organizations providing food technology.

Agribusiness is much more than farming — it covers everything from production to processing, packaging, marketing, and export. With rising global demand, it's one of the most promising and future-ready sectors today.

I am confident that here at CHARGE, you will find a pathway to a bright future in the agribusiness and milling industry.

Director

Mr R.G. Choyal

MISSION & VISION

Our Mission

To develop an inclusive and innovation-driven agribusiness ecosystem through education, research, entrepreneurship, and bridge the gap between academic curriculum, industry requirements and learning outcomes.

Our Vision

To make agribusiness & milling education accessible to all and create world class leaders in food and related science who will find solutions to global food challenges of the future.

Brain Trust Society

Brains Trust Society (BTS), established on 21st September 1992, is a vibrant hub for learning, cultural heritage, and social action. It promotes personality development, management training, and multidimensional growth through workshops, skill-building, and community initiatives.

Brains Trust Society (BTS) is a committed social organization founded in 1992 and formally registered on 24th July, 2013 under the Societies Registration Act, 1958 (Rule-28), BTS has been a pioneer in addressing social, educational, health, and environmental challenges through dedicated programs and initiatives. For over three decades, BTS has believed in the power of collective action, community engagement, and innovative solutions to create lasting impact in people's lives.

At Brains Trust Society, we believe that real change begins with small steps taken together. We welcome individuals, institutions, and partners to be a part of our journey in building a better, brighter future for all.

BTS leads thought leadership in technology, sustainability, and rural empowerment. CHARGE (Choyal Hub for Agribusiness Research, Growth & Entrepreneurship) is an integral part of Brains Trust Society, dedicated to transforming India's agribusiness landscape through research, training, and innovation.

CHARGE: Growing Agribusiness with Knowledge, Innovation, and Startups

Agribusiness Growth

For over 60 years, the Choyal Group has helped grow India's grain milling and food processing industry. Starting in 1966, the company built high-quality machines and began exporting to the world in the 1970s.

CHARGE continues this journey by helping the agribusiness sector grow faster and smarter. We support farmers, entrepreneurs, and youth with the tools and training they need to succeed in today's changing market.

Agribusiness Research

At CHARGE, we believe in solving real problems through research. We work with scientists, universities, and industry leaders to create new ideas and better food solutions.

Recent research includes:

- **“Innovative Flour Processing and Functional Blends”** – This study shows how mixing different types of flour can help people with diabetes and heart problems.
- **“Millets: A Sustainable Solution”** – This research shows how millets (like bajra and ragi) are good for health, easy to grow, and helpful in fighting today's lifestyle diseases.

Our research helps make food healthier, more affordable, and better for the planet. We work with a diverse talented individuals like PhD, MBBS, Researchers, scholars etc for building these types of complex research.

Agribusiness Entrepreneurship

CHARGE is also helping to build the next generation of agribusiness entrepreneurs. Through our special program called PRARAMBH, we help new business ideas grow from scratch. A Simple registration to Bootcamp to a Business, this is what PRARAMBH is.

PRARAMBH provides:

- Mentorship and expert guidance
- Business planning and support
- Help connecting with markets and buyers
- Recognition and training from industry experts

From making healthy snacks with millets to launching smart farming tools, our goal is to help people turn ideas into successful agri-businesses.

Our Core Values

- **Integrity:** We operate with transparency and ethical commitment.
- **Excellence:** We strive for the highest standards in everything we do.
- **Empowerment:** We create pathways for individuals to realize their potential.
- **Sustainability:** We prioritize long-term environmental and economic balance.
- **Collaboration:** We believe in collective growth through partnerships.

CHARGE's training model combines robust theoretical instruction with immersive, hands-on experience. Courses are delivered through:

- Online learning via webinars and video modules
- Offline On-the-job training at our operational flour mill and quality control lab at Arjunpura, Ajmer, Rajasthan
- We also provide the knowledge about packaging, marketing, POS, Quality Control etc at our city office - Choyal tower, Adarsh Nagar, Ajmer, Rajasthan

Our experiential learning approach ensures that every learner graduates with both technical knowledge and workplace confidence. Our online and offline courses are carefully designed for students, fresh graduates, and professionals eager to build a career in the food processing, milling, and agribusiness sectors, as well as for those looking to deepen their expertise in food plant operations, management, and process optimization.

What sets CHARGE apart is our fully operational flour mill plant and advanced laboratory at campus, where trainees gain real-time exposure to the latest milling technologies, product testing, and quality control practices. This hands-on experience ensures that our participants are not only industry-ready but also capable of innovating and leading in their respective fields.

We conduct a rich mix of seminars, expert panel discussions, workshops, and live demonstrations on our platform. Each programme culminates with an industry-recognized certificate awarded by the Choyal Group, adding value to every learner's professional credentials.

Join Us & Be Part Of The Real-Life Learning Experience

**We Make Agribusiness Education
More Affordable & Accessible**

Wide Range Of Free Online Classes

Free Consultation Services

Wide Range Of Courses

Training Center

CHARGE offers various courses to cover a wide range of technical education through its certificate programs. Our week-long short courses equip learners with hands-on experience. On the other hand, our intensive courses run anywhere between 3 months to 12 months. We maintain high standards of teaching through our dedicated and highly motivated teaching staff, who have a combination of theory and practical exposure.

Campus Infrastructure

Where Innovation Meets Implementation Our training and innovation campus in Arjunpura (Ajmer) is designed to replicate real industry conditions. It includes:

- A fully operational flour milling plant for hands-on training
- Advanced food testing laboratories
- Smart classrooms with AV facilities
- Conference and seminar halls
- Residential accommodations
- City office for connection to marketing and understanding with customers.

We provide a professional environment that nurtures both learning and leadership.

Exposure & Opportunity

We aim to build a pool of skilled human capital in the field of flour milling industry through our technical courses and training programs and short term courses for both experienced and inexperienced people. This is part of our corporate responsibility to nurture and develop talent in the country.

Co-Curricular Activities

At CHARGE, we encourage students to take active participation in co-curricular activities. The purpose is to provide opportunities to improve upon their strengths both inside and outside the classroom.

Events, Workshops & Exposure Visits Engagement Beyond the Classroom

To build a well-rounded skillset, CHARGE organizes:

- Expert panel discussions on agribusiness trends
- Seminars on export readiness, food law, and compliance
- International guest lectures and virtual dialogues
- Startup pitch days and demo fests
- Exposure visits to leading processing plants and agri-markets

These experiences offer peer networking, industry visibility, and real-world insights.

Certification and Career Pathways Credentials that Open Doors

On completion of our programs, participants receive an industry-endorsed certificate from R.S. Choyal Group. This certification enhances employability and credibility across the agri-food value chain.

Career Pathways:

- Food Technologist
- Production Manager
- Plant Supervisor
- R&D Assistant
- Quality Assurance Analyst
- Agri-Entrepreneur
- Many More related to Agribusiness.

We also support placement connections and mentorship to guide learners into the workforce.

Who Should Join CHARGE?

Diverse Learners. One Vision. CHARGE is open to anyone passionate about transforming agriculture through innovation. Ideal for:

- Students and fresh graduates in science, food tech, or agriculture
- Professionals seeking upskilling or a sectoral shift
- Aspiring entrepreneurs in rural/urban areas
- SHGs, Farmer Producer Organizations, NGOs
- Researchers and policy enthusiasts in food and sustainability
- We encourage women, first-generation learners, and rural youth to take full advantage of our resources.

Choyal Flour Mill Grinding Facility Centre

CHARGE has established its 40TPD whole wheat flour mill training facility to offer students better insights into commercial production. We train our students in an industry-level plant to give them the right experience. Our goal is to create a great learning environment for our students!

Weighing Bridge

In-house weighbridge facility for weighing at intake of wheat and flour dispatch data. Provides vital MIS Information for better control.

Pre Cleaning & Storage Section

Pre-Cleaning section for primary cleaning of the wheat. Equipped with Drum Sieve and for Pre-Cleaning efficient removal of bigger size impurities mainly occurring at farm level like ropes, hays, straws, etc. Our facility center is equipped with 2x 60 Ton silos for efficient storage and handling of grains. This storage facility helps to store grains for better shelf life.

Fine Cleaning Section

After the Storage Section, the daily requirement of wheat to be cleaned further is transferred to the first cleaning section. In this section, the material goes through Separator to remove lighter impurities like husk, chaffs, and dust. Then through De-Stoner which removes the heavier impurities like mud balls and stones from the material.

Conditioning Section

After the cleaning, wheat is Steel silos. Conditioning also known as Tempering is done to add the optimum moisture content for the best yield and quality.

Milling Section

After Tempering, the wheat is milled into flour with Digitally Controlled Wonder Mill with 30% power-saving patented technology. It provides the miller complete control of the parameters of the mill like Feed, Ampere, Temperature, sifted for better consistency and bran extraction.

Atta Storage Section

After Milling, the flour is stored in Stainless Steel silos. This lets the flour cool down to room temperature. This process is done to maintain the temperature of flour at the time of packing. Our load-cell based silos for flour and bran provide the real-time critical data of flour yield.

Re-Dressing and Packing Section

After the Atta Silos, flour is passed through Entoleter to ensure that there is no live infestation in the flour and then is re-sifted to ensure that no foreign matter passes through and the best quality while packing.

Lab Facility

Our in-house lab facility with all the required equipment ensures to conduct the quality tests during the production to ensure food safety for our consumers.

Complete Agribusiness & Milling Ecosystem Under One Roof

We understand that starting your own business can be overwhelming and confusing. That's why at Charge Incubation Center, we take care of the process for you. We offer everything your new business needs, from preparing your project reports to helping you with government registrations and subsidies. Our experienced team is always on hand to provide our clients with one-on-one support when they need it most.

Project Development:

We will develop complete project for you starting from 2D, 3D drawings, site selection, land development, designing , fabrication, commissioning of plant, recipe development, packaging design.

Operations:

We will provide consultancy on how to maximise your operations for maximum output, efficient plant operations, maintenance, quality control, fumigations, MIS, overall project management after setup.

Automation

Controlling and optimising all the process like sampling of raw material, pre-cleaning, storing, blending, cleaning, grinding, and packaging will help in creating long term growth of the plant.

Training

We will provide training to your staff so they are ready to operate your complete plant.

Licensing:

We will help you get necessary licensing required to start your operations like FSSAI, APEDA, IEC, etc.

Government Registrations

We will help you get the necessary licenses required to start your operations like FSSAI, APEDA, IEC, etc.

Design & Engineering

We will develop 2D, and 3D mechanical drawings, packaging design, and field layouts for your plant commissioning.

Technology Upgradation

We can help you upgrade your existing plant with today's market requirements easily.

Project Reports

We will provide project reports, bankable project reports.

Subsidies & Policies

We will guide you on applicable subsidies & policies for your business.
